AUSTRO-HUNGARY.

Rumor of typhus fever at Pola.

TRIESTE, *October 18, 1897.*

SIR: It is said that several cases of typhus fever have recently occurred at Pola, 75 miles south of this city. The place is the principal naval port, and contains the naval arsenal of the Austro-Hungarian monarchy.

It is semiofficially admitted that three marines of the Austrian war-ship *Maria Theresa*, lying at anchor in the harbor of Pola, and two or three others in the naval barracks near that city have simultaneously contracted a disease with typhoid symptoms. Upon making inquiry at the office of the provincial governor in this city I was informed that the malady of these marines is enteric fever, and has been traced to the eating of infected oysters.

A rumor has also reached Trieste that a similar disease has broken out in the military barracks of Laibach, the capital of Krain, situated 60 miles northeast of Trieste. As military authorities in this country usually keep their own counsel in such matters, the public will probably never get at the facts unless an epidemic should result.

Although but two Austrian ports, Trieste and Fiume, have direct communication with the United States, I shall not fail to watch carefully the further developments at Pola as well as the sanitary condition of all other Adriatic ports.

If the disease at Pola assumes an alarming character and spreads to this city, I shall inform the Department by cable.

I have the honor to be, sir, your obedient servant,

FREDK. HOSSFELD,
United States Consul.

Hon. ASSISTANT SECRETARY OF STATE.

BRAZIL.
